- Prints special order reports while scanning when order is complete
- Verbal notifications:
 - Special Order
 - No Bin
 - Multiple orders
 - Qty greater than 1
- 2 label sizes, 3 colors—white, green or yellow
- All information prints on SO labels
- Comprehensive reporting
- Fully trained installation staff
- Maintenance on all hardware including batteries
- Live Software support 7am to 7pm
- Easy perpetual inventory with current O.H. and verbal notification.
- Bin lookup and locating back to your DMS
- Built in Scheduler for DMS Downloads
- Scans AC Delco and Motor Craft UPC Codes
- Bluetooth printer
- Wireless label printing
- Multiple Franchise support

State of the art wireless Scanner

Major Features and Benefits:

- **Allows for full use of your Arkona Parts System**
- **Cuts time in half**
- **Parts to customers faster**
- **Special Order Label contains customer and your dealership info**
- **Auto loading of information**
- **Totally wireless**
- **Scanner talks giving attention alerts**
- **Less expensive**

Doing a perpetual inventory

Testimonials

PartsWizard System saves me and my employees lots of time. We have been able to knock hours off the time receipting orders. With automatic labels, special orders are no longer a hassle. No more writing on factory boxes. And the bin locating and Mass Bin change ability has been a real time saver. The perpetual inventory on this system not only verifies my on hand counts but gets real time On Hand values before reviewing discrepancies.

Bobby Hedge - Texas Motors Ford

"Our Arkona Scanner system makes our day smooth and easy. Before it was an all day job to check in our very large stock orders. Now we're finished by lunch. We love the Motorcraft to Ford translation feature. The perpetual inventory system has helped us find bin lost parts almost every week. All this and I only load the system once a day".

Jackie Deanes - Freedom Ford

Our Dealer Track parts scan product is a time saver. It use to take about 2 hours to check in our stock Order. No more check-off, receipting in, identifying Special orders and writing labels. Now in an hour and a half we are finished and have more time to spend in other areas.

Wow! What a great tool. In inventory and bin management as well as order check-in we have improved our accuracy 3 fold. We process our incoming orders in half the time and have very few errors. The errors we do have can usually be corrected right on the Order Receipt/Adjust screen and posted directly to my Arkona computer system.

I can find a bin location right on the scanner and put the part away, and if it doesn't have a bin location I can assign it one right on the scanner and update my Arkona system as soon as I sync the gun. From the intuitive "talking" scanner to the Special Order Labels that print automatically we feel we made the best decision with ScanSolutions!

Scott Sharpe - Director Crown Auto Group

These are parts that didn't post after scanning. None were scanned. You can put these parts on backorder, cross ship or cancel them right here on this screen.
